SUSTAINABILITY POLICY

2021

The Brisbane Racing Club is a growing operation that currently occupies over 90 hectares of land. This is predominantly made up of two racecourses, two sports clubs, a shopping centre, a retirement village, a childcare centre, an aquatic centre and a residential apartment complex. BRC has identified the environmental responsibility that accompanies this large and diverse operation. As a community-based organisation and a responsible member of the Brisbane community, we are committed to a green future. Our Board and Sustainability Committee aim to lead by example and encourage our staff to help achieve our sustainability goals. In doing so, The Club hopes to move in the direction carbon neutrality.

The Brisbane Racing Club will continue to be a positive contributor to both the community and the environment by:

- Ensuring that sustainability is a key factor in our business decisions
- Actively seeking to increase the amount of waste we divert from landfill
- Pursuing new ways to minimise the amount of fossil fuels consumed in our operations
- Transitioning towards cleaner energy sources
- Regularly educating our staff on how to be environmentally responsible and inspiring them to contribute towards our sustainability goals
- Actively looking for new and innovative ways to reduce our environmental impact
- Encouraging our suppliers to move towards more sustainable practises and bring forward ideas to reduce our environmental impact
- Committing resources to increasing sustainable practices

The next policy review is scheduled for December 2022
